

Year	1	2	3	4	5
General	<p>Refer to Aftercare Scheme Section 5 Creation and Management of discrete Character Areas</p> <p>Allow sufficient visits each year for the purpose of executing maintenance and management.</p> <p>Water Plants and seeded areas as necessary to ensure establishment and continued thriving. Watering is particularly important during the months of May-August each year.</p> <p>Carry out annual inspection of plants and areas of seeding that are failing to thrive in August each year. Diseased or dying and replace or reseed as soon as possible at the appropriate time.</p> <p>Removal / treatment of noxious weeds</p>	<p>Refer to Aftercare Scheme Section 5 Creation and Management of discrete Character Areas</p> <p>Allow sufficient visits each year for the purpose of executing maintenance and management.</p> <p>Carry out annual inspection of plants and areas of seeding that are failing to thrive in August each year. Diseased or dying and replace or reseed as necessary as soon as possible at the appropriate time.</p> <p>Removal / treatment of noxious weeds</p>	As year 2	As year 2	<p>As year 2</p> <p>Review success of previous management and develop prescriptions for the ongoing management of the site.</p>

Year	1	2	3	4	5
Existing and new Woodland and Hedgerows and Additional scrub /thicket planting	<p>Refer to Aftercare Scheme Section 5 Para 5.2</p> <p>Weed control.</p> <p>Thin out non- native species</p> <p>Clear 300 mm around each Plant</p> <p>Replace failed new planting</p> <p>Maintain rabbit guards and canes and straighten plants</p> <p>Maintain stockproof fencing</p> <p>Trim and shape hedgerows</p>	<p>Refer to Aftercare Scheme Section 5 Para 5.2</p> <p>Weed control.</p> <p>Thin out non-native species</p> <p>Clear 300 mm around each Plant</p> <p>Replace failed new planting</p> <p>Cut tall and coarse grass and remove.</p> <p>Maintain plants / guards and canes.</p> <p>Monitor success of existing tree work and new planting.</p>	As Year 2	As Year 2	<p>As Year 2</p> <p>Review success of woodland management and thicket planting. Selective removal of tree species from the woodland margins to allow edge scrub to develop and achieve a variable width of scrub.</p> <p>Develop prescriptions for ongoing management of the site.</p>

Year	1	2	3	4	5
Species Rich Grassland	<p>Refer to Aftercare Scheme Section 5 Para 5.3</p> <p>The Species rich grassland pasture will be managed as a permanent pasture.</p> <p>Cut grassland to 60mm in August after seeds have ripened and allow cuttings to dry off and shed their seeds and bale up and remove from site. If there is not a lot of growth, then ensure the cuttings are finely chopped with two passes of the mower.</p> <p>Tall weed species to be cut and removed from site.</p> <p>Areas of poor grass take to be cultivated and reseeded</p>	<p>Refer to Aftercare Scheme Section 5 Para 5.3</p> <p>The Species rich grassland pasture will be managed as a permanent pasture.</p> <p>Cut grassland to 60mm in August after seeds have ripened and allow cuttings to dry off and shed their seeds and bale up and remove from site.</p> <p>Tall weed species to be cut and removed from site.</p> <p>Areas of poor grass take to be cultivated and reseeded</p> <p>Monitor success of Species Rich Grassland</p>	As Year 2	As Year 2	<p>As Year2</p> <p>Review success of previous management an develop prescriptions for the ongoing management of the site.</p>

Year	1	2	3	4	5
<p>Water Bodies – Pond and Ditches</p>	<p>Refer to Aftercare Scheme Section 5 Para 5.4</p> <p>The shaped-up pond will be left to be colonised naturally with native Aquatic plants.</p> <p>Debris and silt will be removed as necessary to maintain maximum storage capability of open water and provide for the removal of overgrown plants to the pond edge for access.</p> <p>Management should be supported by appropriate maintenance of adjacent terrestrial habitats.</p> <p>Existing and new periphery drains to be assessed annually to ensure they are clear of obstructions and silting.</p> <p>The banking to the ditches will be left to colonise naturally with emergent plant species.</p> <p>Limited maintenance in early stages.</p>	<p>As Year 1</p> <p>Check requirement for scrub/invasive weed control and undertake action to remove as necessary</p>	<p>As Year 2</p>	<p>As Year 2</p>	<p>As year 2</p> <p>Review success of previous management and develop prescriptions for ongoing management of the site.</p>
