Dear Mr Hope

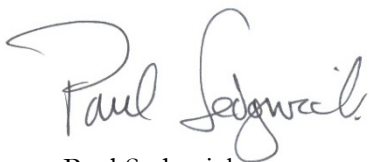

COMMON BANK WORKS, COMMON BANK LANE, CHORLEY: PLANNING APPLICATION FOR ERECTION OF RECYCLING WASH PLANT

This is the retrospective planning application for the erection of the wash plant at Common Bank Works that we have discussed.

The technical specification for the plant shows the various components that have been selected. I have included a noise impact assessment and the non-technical summary that formed part of the permit application to the EA. I've also provided details of the form and layout of the proposed plant and also the context of its location within the wider site.

Hopefully this will be sufficient information for the application to be determined but if you need any additional information I shall endeavour to provide it.

Yours sincerely

Paul Sedgwick
