

Red Scar Wood

Lower Hall Farm

Plant Site behind trees

PHOTOGRAPH LOCATION PLAN

VISUAL IMPACT ASSESSMENT
 These photographs, taken from the Brockholes Park Wildlife and Visitor Centre, illustrate open and expansive views across the Ribble into the Application Site, particularly from the elevated sitting area (Viewpoint 35). The whole of the extraction area is visible, however the Plant Site is screened by the vegetation along Bezza Brook.
High potential visual impact.

Viewpoints 36 and 37 are taken from just above river level therefore views into the proposed extraction areas are less obvious, the main impact, **High**, will be during initial vegetation clearance and site stripping. The Plant Site will be visible in front of the woodland west of Bezza Brook Nursery from Viewpoint 37 therefore **High** potential visual impact.

VIEWPOINT 35 - two photographs giving a panoramic view across Application Site from elevated sitting area in Brockholes

Red Scar Wood

VIEWPOINT 36 - looking north west from track in Brockholes across river into area of former mineral workings

Lower Hall Farm

Bezza House behind Plant Site

VIEWPOINT 37 - looking east near public footpath exit from Boilton Wood
