

## Objection to Harleyford Aggregates: Flooding

The Ribble forms Samlesbury's north-western boundary for a distance of approximately four miles, and it sometimes floods alarmingly.

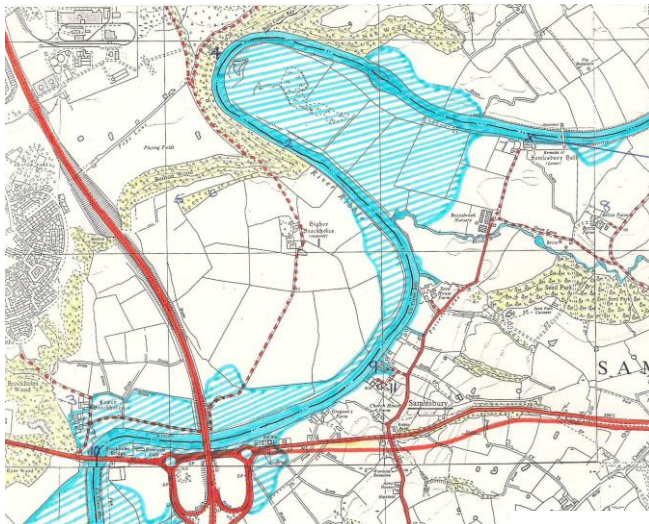

1866 was traumatic. The valley was completely under water and in places the river was *fully a mile in width*.

*The Ribble in flood September 1946*

*The Ribble's normal level.*

← Behind Lower Hall the Ribble rose approximately thirty feet above its normal level.

Areas of Samlesbury, Brockholes and Elston that are known to flood.

*Property close to Junction 31 of the M6 at Samlesbury, on Boxing Day 2015.*
