

Comment for planning application LCC/2022/0003

Application number	LCC/2022/0003
Name	Simonswood Parish Council
Address	The Barn Sandy Brow Lane Knowsley
Type of Comment	Objection
Comments	<p>VERY STRONGLY OBJECT</p> <p>We would like LCC to delay this application as we would like an open meeting with the company +Simonswood residents + Kirkby residents and Melling residents + others. This company is registered at companies house for Treatment and disposal of non-hazardous waste. Medical Waste is hazardous materials especially due to the toxins emitted?</p> <p>Resident are already troubled with the smells, noise, air quality and HGV's on this site.</p> <p>The roads are not fit for purpose, this would make it worse. Nobody could walk to the site as the roads are dangerous, residents have had near misses from HGV's especially on dark nights. There is no public transport in Simonswood. This is a probable Sonae no 2. Therefore we are seeking assistance from MP's. United Utilities have not been informed, water is pumped from underground lakes/reservoirs on this site to Bickerstaffe pumping station and may be one at Kirkby.</p> <p>Lancashire Council Council need to do an in depth site visit on the industrial estate to see how the companies flaunt their licenses. Simonswood residents and residents from Kirkby and further would have no relief from this incinerator as it works 24 hrs per day.</p> <p>I have written requesting an open meeting but on the application form there is no phone numbers or emails. The industrial site is not for storage of reclaimed materials, the materials should only be stored for a minimal amount of time, materials on this site have been piling up for years and mounds are getting higher to store it.</p>
