

1. Gently sloped roof from a low point to the west (rear) elevation, to a high point at the 'prow' of the building at the apex of the triangular plan form over the main function space.
2. Stone ballasted inverted roof surface
3. Linear roof light above the central circulation core
4. Concealed internal rainwater collection gutter within the roof along the west elevation.
5. Access for inspection of the roof and gutter via cherry picker to the west elevation
6. Access to the roof to allow inspection and maintenance of the roof light with integral safety fall restraint system
7. Bronze coloured metal panelled eaves and roof soffit to perimeter and roof overhang to north and south elevations

Axonometric - Roof

BUILDING DESIGN PARTNERSHIP SHALL HAVE NO RESPONSIBILITY FOR ANY USE MADE OF THIS DOCUMENT OTHER THAN FOR THAT WHICH IT WAS PREPARED AND ISSUED.
